

## **CAP Immunisation Record – International Students**

Please request a copy of your Immunisation Record from the Practice Nurse at your medical centre and send it to [international@nmit.ac.nz](mailto:international@nmit.ac.nz) or attach as a document to your online application.

If you are accepted on to the Certificate in Nursing (Competence Assessment Programme) we ask you to undergo blood tests for a list of diseases in order to see what your immune status is for each disease. Medlab will send these results to our Clinical Placement Coordinator to review.

Once we have the results from your blood tests, we may recommend that you get vaccinations for the diseases you show no immunity to. You can choose not to be vaccinated, however, this may limit the clinical placements we can place you in when the time comes.
